

**TRUNCATED APOLIPOPROTEIN B-CONTAINING
LIPOPROTEIN PARTICLES FOR DELIVERY OF COMPOUNDS
TO TISSUES OR CELLS**

5

ABSTRACT

10 A lipoprotein compound delivery particle comprises: (a) a lipophilic or
amphipathic compound to be delivered (*e.g.* paclitaxel); (b) at least one polar lipid (this
ingredient being optional when the lipophilic or amphipathic compound serves itself as a
polar lipid); (c) optionally, at least one neutral lipid; and (d) a truncated apolipoprotein B
(apoB) protein having a deleted LDL receptor binding region. Conjugates useful for
making such particles, pharmaceutical formulations containing such particles, and
methods of using such particles are also described.
